## Future Problem Solving Students - A Five Year Study

## A Comparison of Reading and Mathematics Performance Between Students Participating in a Future Problem Solving Program and Nonparticipants

## THE STUDY

Measurement Criteria: The Minnesota Comprehensive Assessment (MCA), Reading and Mathematics Scaled Scores Data Collection: Grandview Middle School (Mound, MN)
Statistical Analysis: Performed by Scholastic Testing Service, Inc.
Performance data on the MCA was collected from 2010-2014 for students in grade 6 at Grandview Middle School in Mound, MN (Westonka Public School District). Students were identified as either FPS: students participating in a Future Problem Solving program, or Non-FPS: students not participating in the program. Summary statistics were developed for each group of students by year and across years.

The MCA scaled scores range from 601-699 with the first digit identifying the grade level. For purposes of this study, the actual scaled score values are only used to compare FPS and Non-FPS student performance. To determine if the mean scores across the years were significantly different, $t$-tests were used. A Cohen's $d$ test was then performed to measure the effect of the size of the found differences.

## MATHEMATICS PERFORMANCE

Summary Statistics: Table 1 below provides summary statistics for the students, both by year and across years, for performance on the Mathematics section of the MCA. Table 2 on the following page provides detailed descriptions of the headings used in the summary statistics table.

## Table 1

Summary Statistics for the MCA - Mathematics

| BY YEAR |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

Table 2
Descriptions of Summary Statistics Headings

| Year | Year the MCA was administered |
| :---: | :--- |
| ID | FPS = Students participating in a Future <br> Problem Solving program; <br> Non = Students not participating in a program |
| NCNT | Number of students that took the MCA |
| MEAN | Average scaled score |
| SIGMA | Standard deviation of the scaled score |
| SEM | Standard Error of the Measurement |
| KR21 | Kuder-Richardson reliability |
| 0.01 | Performance at the 1st percentile |
| 0.05 | Performance at the 5th percentile |

| 0.16 | Performance at the 16th percentile |
| :---: | :--- |
| 0.25 | Performance at the 25th percentile |
| 0.4 | Performance at the 40th percentile |
| 0.5 | Performance at the 50th percentile |
| 0.6 | Performance at the 60th percentile |
| 0.75 | Performance at the 75th percentile |
| 0.84 | Performance at the 84th percentile |
| 0.95 | Performance at the 95th percentile |
| 0.99 | Performance at the 99th percentile |

Median Performance: Figure 1 below shows the median performance by year between the two groups of students while Figure 2 compares the median performance across years between the two groups of students.

Figure 1
Median Performance
By Year - Mathematics

Figure 2
Median Performance Across Years - Mathematics

Significance of the Difference: We used $t$-tests to determine the significance of the differences found between the mean scores by year and across the years. Table 3 below shows in all cases that the difference between the means was found to be significant and the Cohen's $d$ test of the effect of size indicates a large effect.

Table 3
Significance of the Difference Between the Mean Scores - Mathematics

| Year | t | Significant | d | Effect |
| :---: | :---: | :---: | :---: | :---: |
| 2010 | 7.259 | Yes | 1.691 | Large |
| 2011 | 10.700 | Yes | 2.300 | Large |
| 2012 | 5.856 | Yes | 1.289 | Large |
| 2013 | 8.255 | Yes | 1.427 | Large |
| 2014 | 4.977 | Yes | 1.011 | Large |
| $2010-2014$ | 14.290 | Yes | 1.343 | Large |

## READING PERFORMANCE

Summary Statistics: Table 4 below provides summary statistics for the students, both by year and across years, for performance on the Reading section of the MCA. The headings used in the summary statistics table are the same as the Mathematics section (see Table 2 for descriptions).

Table 4
Summary Statistics for the MCA - Reading

| BY YEAR |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | ID | NCNT | MEAN | SIGMA | SEM | KR21 | 0.01 | 0.05 | 0.16 | 0.25 | 0.4 | 0.5 | 0.6 | 0.75 | 0.84 | 0.95 | 0.99 |

| 2012 | FPS | 21 | 673 | 10.36 | 5.014 | . 766 | 650 | 659 | 669 | 669 | 669 | 673 | 673 | 673 | 674 | 699 | 699 |
| 2013 | FPS | 32 | 672 | 13.10 | 5.097 | . 849 | 650 | 652 | 660 | 661 | 667 | 673 | 675 | 683 | 685 | 699 | 699 |
| 2014 | FPS | 32 | 673 | 14.75 | 4.935 | . 888 | 653 | 653 | 660 | 663 | 665 | 670 | 675 | 689 | 690 | 699 | 699 |
| ACROSS YEARS |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 10-14 | Non | 642 | 659 | 12.32 | 6.111 | . 754 | 631 | 641 | 648 | 651 | 656 | 659 | 662 | 666 | 670 | 680 | 699 |
| 10-14 | FPS | 129 | 673 | 12.20 | 4.944 | . 836 | 650 | 654 | 661 | 665 | 669 | 673 | 673 | 681 | 687 | 699 | 699 |

Median Performance: Figure 3 below shows the median performance by year between the two groups of students while Figure 4 compares the median performance across years between the two groups of students.

Figure 3
Median Performance
By Year - Reading

Figure 4
Median Performance
Across Years - Reading

Significance of the Difference: We used $t$-tests to determine the significance of the differences found between the mean scores by year and across the years. Table 5 below shows in all cases that the difference between the means was found to be significant and the Cohen's $d$ test of the effect of size indicates a large effect.

Table 5
Significance of the Difference Between the Mean Scores - Reading

| Year | t | Significant | d | Effect |
| :---: | :---: | :---: | :---: | :---: |
| 2010 | 5.581 | Yes | 1.275 | Large |
| 2011 | 9.466 | Yes | 2.068 | Large |
| 2012 | 4.301 | Yes | 0.935 | Large |
| 2013 | 4.943 | Yes | 0.950 | Large |
| 2014 | 5.291 | Yes | 1.090 | Large |
| $2010-2014$ | 11.874 | Yes | 1.142 | Large |

## CONCLUSION

In all cases, students participating in the Future Problem Solving Program performed significantly higher on the MCA in both areas of Mathematics and Reading.
